

states that the interaction for a secondary filter is the interaction between objects specifically being determined in response to a query by implementing a mathematical comparison of the objects. These filters are defined by the desired interaction condition specified between objects. These filters are not defined based on any positional relationship.

Each of the claims now pending in this application is believed to be in condition for allowance. Accordingly, favorable reconsideration of this case and early issuance of the Notice of Allowance are respectfully requested.

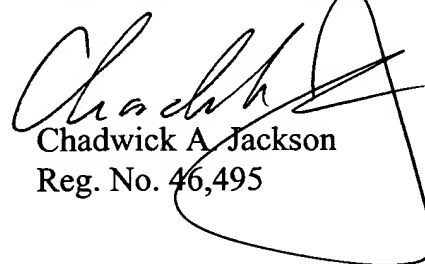

Additional Fees:

The Commissioner is hereby authorized to charge any insufficient fees or credit any overpayment associated with this application to Deposit Account No. 19-5127 (19111.0037).
